Sprint Demo – 2 & 3
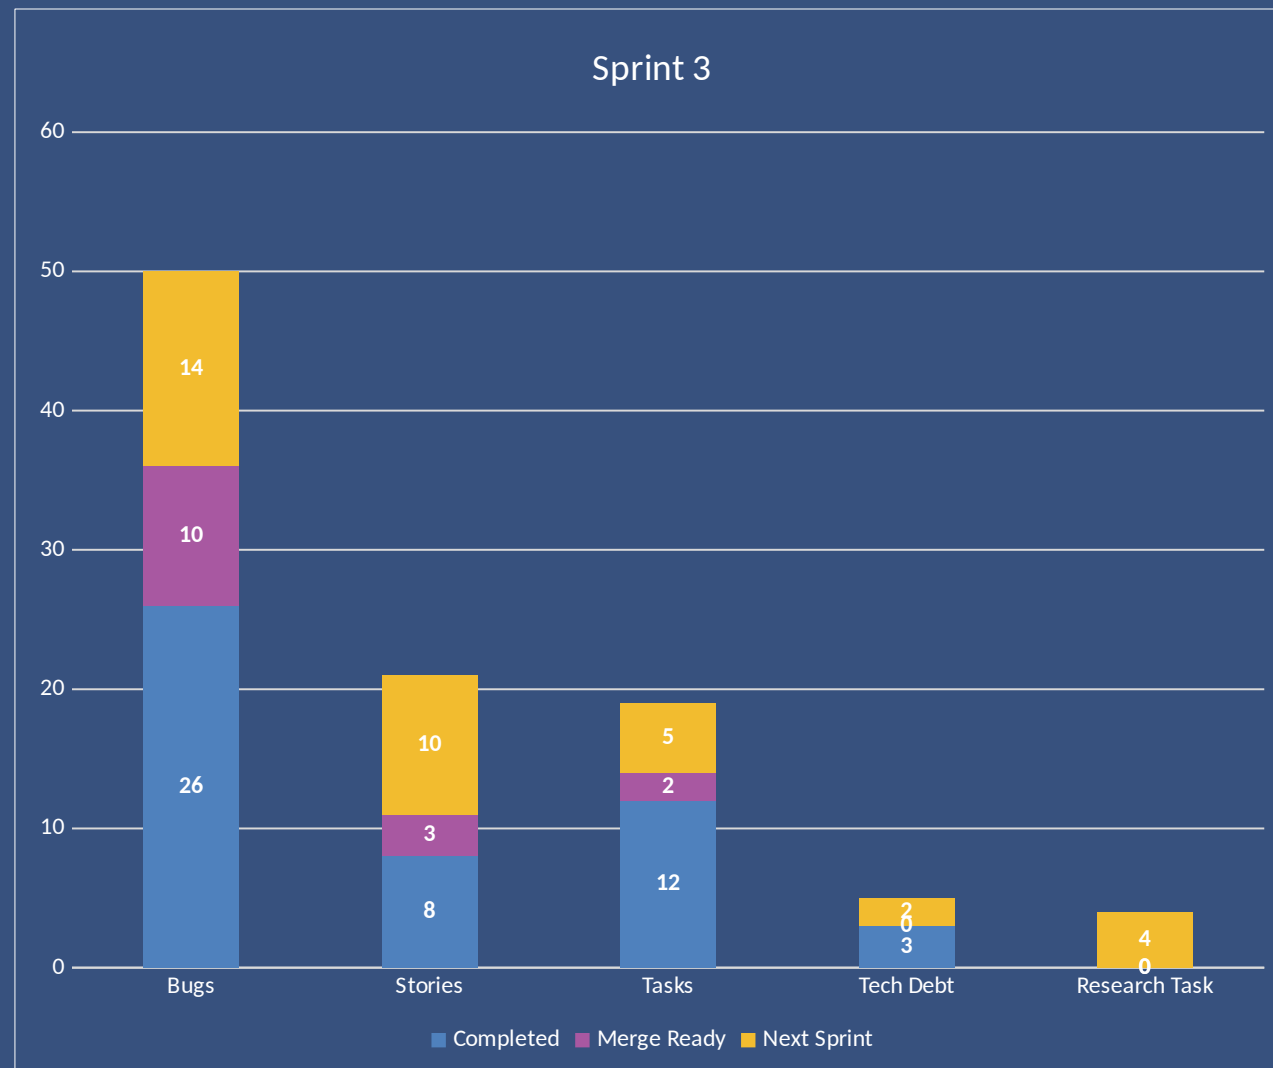

Accomplishments in Sprint 2

1. Upgrades of MongoDB driver to 4.1.X. and Mongoose to 6.0.12 which are latest versions

2. Upgrade of Terraform from 1.0.10 to 3.11.0

3. Booking Tab Details for flights, hotels, and cars

Sprint 2

Accomplishments in Sprint 3

1. Command Center dashboard implemented

2. Disable login functionality for disabled agencies

3. Refactoring of get room API

Agile and Scrum Learnings from Sprints 2 and 3

Positives:

1. Team members have a better view of all the components being developed rather than being siloed with their own work.

2. Backlog grooming sessions have helped the testers to get clarifications as they were also involved in them.

3. Devs reworked quickly on the bugs identified for QAs to resume testing.

Identified Areas for Improvement:

1. Team is committing to more work than their actual capacity hence the issues are spilling over to the next sprint.

2. If there are requirement changes, they must be communicated across the entire team.

3. Effective communication on items released to production.

4. Team should do better testing impact analysis on tech debt issues.

5. Story Grooming wasn't up to expectations as it was the first time grooming so a lot of tickets have not been sized or clarified before the sprint started which reflected in team's burndown chart.

6. Add custom labels for Dev and QA owners to easily identify the persons responsible for Dev changes and QA testing

7. A lot of tickets in code-review stage were left unattended. The team proposed to have another swim lane- 'Dev Deployed'

Demo from Sprints 2 & 3

xeniapp

Features:

Multitenant

1. Disable/enable agency

2. Payment feature

3. Flight/hotel/car dashboard
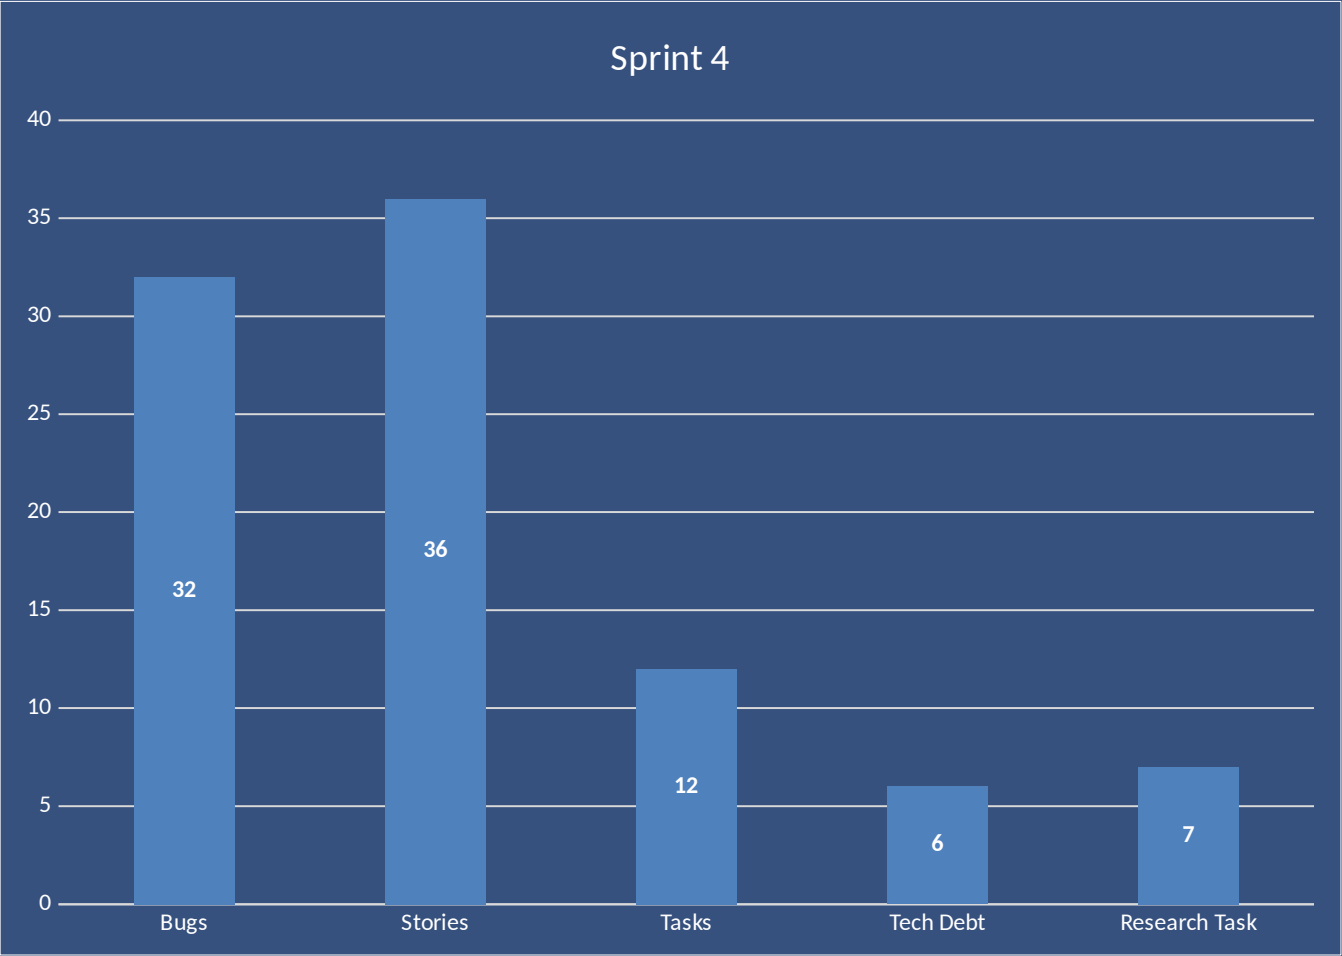

4. Agent invite feature

Booking Engine

1. Group by refundability and board basis

Sprint 4

Features being worked on in this Sprint:

1. Restrict sign up by domain name
2. Hotels - map search - search as user moves
3. Support feature implementation
4. Additional filters for hotels
5. Making tbo live

Sprint 4 Demo – 27th December
